SUBJECT INDEX

Acetylcholinesterase - in carp brain, 511
Acetylcholine - in carp brain, 511
Acetylcholine release, 9
Acetylcholine release - modulation by muscarinic receptors, 9
Acetylcholine synthesis - effect of calcium, 403
Acetylcholine synthesis - in synaptosomes, 403
Acetylcholinesterase - allosteric properties, 49
Acetylcholinesterase - characterisation of Triton solubilised form, 49
Acetylcholinesterase - effect of NaBr, 157
Acetylcholinesterase - effect of trimethyl tin intoxication, 475
Acetylcholinesterase - histochemistry, 475
Acetylcholinesterase - in superior cervical ganglion, 157
Acetylcholinesterase - kinetic properties, 49
Acetylcholinesterase - molecular forms, 157
Acetylcholinesterase - monoclonal antibodies, 517
Adenosine derivatives - release, 411
Adenylate cyclase activity - in synaptosomes, 339
Aleuria lectin - binds to receptors, 185
5-aminoimidazole-4-carboxamide riboside - effect on purine release, 485
S-aminoethyl-L-cysteine transaminase - purification and characterisation, 285
Antibodies - to proteolipids, 169
Aromatic-L-amino acid decarboxylase - inhibited by N-methyliosolinuim, 315
Astrocyte cultures - expression of mRNAs, 215
Astrocytes - effect of thyroid deficiency on cell, 239
Astroglial cell cultures - from spinal cord, 365
Autoradiography - of muscarinic receptors, 91, 475
Axonal transport - in retinal ganglion cells, 185
Axonal transport - of Aleuria lectin receptors, 185
Axonal transport - of noradrenaline, dopamine-hydroxylase and NPY, 39
Axonal transport - of receptors, 185

Benzodiazepine complex - binding of (^{35}S)TBPS, 377
Benzodiazepine receptor, 145
Benzodiazepines - interaction with a histadine residue, 145
Bicuculline - effect on glycerolipid, 397
Binding - of ^{3}H-GABA, 115
Binding - of ^{3}H-muscimol, 179
Binding - of ^{3}H-tryptophan, 25

C-AMP - enhances gene expression, 259
C-AMP dependent phosphorylation, 161
C-DNA cloning - of GABAa receptor, 33
Calcium - effect on acetylcholine metabolism, 403
Calcium - effect on citrate metabolism, 403
Calcium binding protein, 381
Calmodulin - effect of ^{3}H-glutamate accumulation, 17
Calmodulin - effect on ^{3}H-glutamate binding, 17
Calpain II - activity with casein, 307
Calpain II - regional distribution, 307
Calpastatin - activity in presence of casein, 307
Calpastatin - regional distribution, 307
β-carbolines - interaction with benzodiazepine receptor, 145
Carp brain - muscarinic system, 511
Casein - effect on calpain II activity, 307
Casein - effect on calpastatin activity, 307
Catecholamine levels - effect of x-irradiation, 97
Cationic currents - of gonadotroph cells, 265
Cations - effect on GFAP, 421
^{3}H-CD - binding to muscarinic receptors, 333
Cholecystokinin octopeptide sulfate - immunoassay, 55
Choline acetyltransferase - in carp brain, 511

Cholinergic markers - effect of hemicholinium analogs, 531
Cholinesterase - release, 199
Cholinesterase activity - measurement, 199
^{3}H-(+)-cis-methyldioxolane - see ^{3}H-CD, 333
Citrate metabolism - effect of calcium, 403
Citrate metabolism - in synaptosomes, 403
Cloning - of human GABAa receptor, 33
Cochlear nucleus - localisation of calcium binding, 381
Cryopreservation - dopamine release, 349
2',3'-cyclic nucleotide 3'phosphohydrolase - in glial cells, 239
Cyclosporin A - enhances neurotoxicity of MPTP, 249

D-valine - inhibits fibroblast growth, 365
D1 receptors - binding studies, 321
D2 receptors - binding studies, 321
Dopamine - action on serotonin-N-acetyltransferase, 549
Dopamine behaviours, 107
Dopamine content - effect of x-irradiation, 97
Dopamine neurones - effect of neurotoxins, 127
Dopamine receptors - on synaptosomes, 339
Dopamine release - effect of uridine, 107
Dopamine release - from striatal slices, 107
Dopamine release - from synaptosomes, 349
Dopamine uptake sites - binding of ^{3}H-GBR 12935, 325
Dopamine-β-hydoxylase - axonal transport, 39
Dopamine-β-hydoxylase - subcellular distribution, 39
Dopamine-β-hydroxylase activity - in vesicles, 445
Dopaminergic neurones - effect of MPP+, 223

Elec-39 - monoclonal antibody, 517
Ethanol - effect on muscarinic receptors, 91
Excitatory amino acid receptors - and protein kinase C, 131
Excitatory amino acids, 1
Excitatory amino acids - phosphoinositide hydolysis, 131
Excitatory amino acids - receptors linked to inositol phosphates, 1
Excitatory amino acids - receptors, 1
Expression of GFAP mRNAs, 215
Expression of tubulin mRNAs, 215

Fatty acyl groups - from phosphatides to opiate ligands, 207
Fatty acyl-CoA - elongation and condensation, 497
Fatty acyl-CoA - in jimpy mouse, 497
Fibroblast growth - inhibited by D-valine, 365

^{3}H-GABA binding - in Drosophila CNS membranes, 115
GABA - regulates serotonin-N-acetyltransferase, 549
GABA - regulation of serotonin-N-acetyltransferase, 541
GABA displaceable ^{3}H-muscimol binding, 179
GABAa receptor - cloning of c-DNA, 33
GABAb receptors - negative coupling with phosphatidylinositol turnover, 359
Ganglioside - uptake, 455
^{3}H-GBR 12935 binding - to dopamine uptake sites, 325
Gene expression - effect of c-AMP, 259
Gene structure - of phenylethanolamine-N-methyltrasferase, 555
GFAP - effect of metabolic cations, 421
GFAP - effect of pH, 421
GFAP mRNAs, 215
Glial fibrillary acid protein - see GFAP, 421
^{3}H-glutamate - accumulation and binding, 17
^{3}H-glutamate accumulation - effect of calmodulin, 17
^{3}H-glutamate binding - from rat adrenal, 137
^{3}H-glutamate binding - quisqualate sensitive, 137
^{3}H-glutamate uptake - effect of calmodulin, 17
Glutamate - inhibits protein synthesis, 293
Glutamine synthetase - in glial cells, 239

Glycerolipid - effect of bicuculline, 397
Glycerolipid - effect of valproic acid, 397
Glycerolipid - formation, 397
GM1 ganglioside - uptake, 455
Gonadotroph cells - cationic currents, 265
Gonadotroph cells - in culture, 265

Haloperidol treatment - uridine effects on behaviour, 107
Hemicholinium analogs - effect on cholinergic and and GABAergic systems, 531
Histidine residue - of Benzodiazepine receptor, 145
HNK-1 - monoclonal antibody, 517
HPLC - for determining taurine, 429
5-HT - analysis by microdialysis, 503
5-HT - in freely moving rats, 503
5-hydroxyindoleacetic acid - analysis by microdialysis, 503
5-hydroxyindoleacetic acid - in freely moving rats, 503
6-hydroxydopamine - effect on dopamine neurones, 127
6-hydroxydopamine - neurotoxin, 127
Hypoxic/hyptensive rats - release of purines, 485
Immunoassay - 0f cholecystokinin, 55
Inositol phosphate - in neonatal rat striatum, 1
Inositol phosphate - receptors of excitatory amino acids, 1
Inositol phosphates - receptors, 1
Inositol phospholipid breakdown - in SH-SY5Y cells, 73
Insect nervous system - binding of ^{3}H-saxitoxin, 391

Jimpy mouse - fatty acyl-CoA, 497

Luteinizing hormone - regulation of steroid receptors, 277
Luteinizing hormone - synthesis of subunits, 259

MAO - inhibited by N-methylisoquinolinium ion, 315
Methylserotonin - in synaptosomes, 227
1-methyl-4-phenylpyridinium ion [MPP+] - effect on dopaminergic neurones in goldfish retina, 223
N-methyl-4,phenyl-1,2,3,6-tetrahydropyridine (MPTP) - see, 249
N-methylisoquinolinium ion - inhibitor of aromatic-L-amino acid decarboxylase, 315
N-methylisoquinolinium ion - inhibitor of MAO, 315
N-methylisoquinolinium ion - inhibitor of tyrosine-hydroxylase, 315
N-methylscopolamine - binding, 301
N-methylscopolamine - kinetics of interaction with muscarinic receptors, 301
Modulation - of acetylcholine release, 9
Monoaminergic levels - effect of MPP+ in retina, 223
Monoclonal antibodies - to acetylcholinesterase, 517
MPP+ - effect on monoamine levels in goldfish retina, 223
MPTP neurotoxicity - enhanced by cyclosporin A, 249
MRNA - of phenylethanolamine-N-methyltransferase, 555
MRNAs - from tubulin and GFAP in astrocytes, 215
Muscarinic receptors - effect of ethanol, 91
Muscarinic antagonists - effect on autoreceptors, 153
Muscarinic autoreceptors, 153
Muscarinic autoreceptors - effect of antagonists, 153
Muscarinic components - in carp brain, 511
Muscarinic receptors, 9
Muscarinic receptors - autoradiography, 91
Muscarinic receptors - binding of ^{3}H-QNB and ^{3}H-CD, 333
Muscarinic receptors - coupled to inositol phosphates, 73
Muscarinic receptors - do not sensitize, 9
Muscarinic receptors - effect of scopolamine treatment, 333
Muscarinic receptors - effect of trimethyl tin intoxication, 475
Muscarinic receptors - interaction with N-methylscopolamine, 301
Muscarinic receptors - modulates acetylcholine release, 9
Muscarinic receptors - quantitative autoradiography, 475
^{3}H-muscimol binding - sensitivity to GABA, 179

NaBr treatment - effect of acetylcholinesterase, 157
NC-1 - monoclonal antibody, 517
Neurofilament proteins - phosphorylation, 467
Neurofilament proteins -in neurones, 467
Neuropeptide Y - subcellular distribution, 39
Neurotoxins - effect on dopamine neurones, 127
Noradrenaline - axonal transport, 39
Noradrenaline - subcellular distribution, 39
Noradrenaline content - effect of x-irradiation, 97
Noradrenergic storage vesicles, 445
Nucleotide sequences - of GABAa receptor α-subunit, 33

Oligodendrocytes - effect of thyroid deficiency on cell markers, 239
"On-line" - measure of cholinesterase activity release, 199
Opiate ligands - transfer of fatty acyl groups from phosphates, 207
Ornithine decarboxylase activity, 433
Ornithine decarboxylase activity - subcellular distribution, 433

Palmitate - in normal and trembler mice, 61
Palmitate - uptake and metabolism, 61
Patch-clamp - of gonadotrophs, 265
Phenylethanolamine-N-methyltransferase gene - mRNA, 555
Phenylethanolamine-N-methyltransferase gene - structure, 555
Phosphatides - transfer of fatty acyl groups to opiate ligands, 207
Phosphatidylinositol turnover - negatively coupled with GABAb receptors, 359
Phosphoinositide hydrolysis - effect of excitatory amino acids, 131
Phosphorylation - of neurofilament proteins, 467
Phosphorylation - c-AMP dependent process, 161
Phosphorylation - in leech CNS, 161
Phosphorylation - of 79 kDa protein, 161
Pituitary cell aggregates, 277
Pituitary cells - in tissue culture, 259
Protein kinase C - and neonatal excitatory amino acids, 131
Protein synthesis - inhibited by glutamate, 293
Proteolipid antigens - at Torpedo neuromuscular synapses, 169
Proteolipids - immunohistochemical localisation, 169
Purine release - effect of 5-aminoimidazole-4-carboxamide riboside, 485
Purine release - from hypoxic/hypotensive rat cortex, 485
Pyroglutamyl peptidase II - a thyrotropin release hormone degrading enzyme, 81
Pyroglutamyl peptidase II - properties, 81
Pyruvate dehydrogenase - activity, 355

^{3}H-(-)-quinuclidinyl benzilate - see ^{3}H-QNB, 333
Quisqualate - effect on ^{3}H-glutamate binding, 137

Receptors - and axonal transport, 185
Receptors - for steroids, 277
Receptors - to excitatory amino acids, 1
Release - of acetylcholine, 9
Release - of adenosine derivatives, 411
Retina - dopaminergic neurones, 223
Retina - release of adenosine derivatives, 411
Retina - serotonin-N-acetyltransferase, 541

^{3}H-saxitoxin - binding sites, 391
^{3}H-saxitoxin - binding to sodium channel, 391
Scopolamine - chronic effect on muscarinic receptors, 333
Secretogranin II - a gonadotroph polypeptide, 277
Secretogranin II - regulated by steroid receptors, 277
Serotonin receptors - on synaptosomes, 339
Serotonin-N-acetyltransferase - in retina, 541, 549
Serotonin-N-acetyltransferase - regulated by GABA, 541, 549
SH-SY5Y neuroblastoma cells - muscarinic receptors, 73
Sodium channels - binding of ^{3}H-saxitoxin, 391

Steroid receptors, 277
Steroid receptors - regulate luteinizing hormone, 277
Steroid receptors - regulate secretogranin II, 277
Synaptosomal dopamine release - from cryopreserved tissue, 349
Synaptosomal dopamine release - from post mortem brain, 349
Synaptosomes - acetylcholine synthesis, 403
Synaptosomes - behaviour of α-methylserotonin, 227
Synaptosomes - dopamine and serotonin receptor distribution, 339
Synaptosomes - dopamine release, 349
Synaptosomes - from rat cerebral cortex, 293
Synaptosomes - morphology in different fractions, 339
Synaptosomes - protein synthesis, 293
Synaptosomes - adenylate cyclase activity, 339
Synaptosomes - in different fractions, 339

Taurine - determination, 429
(^{35}S)t-butyl bicylophosphosphorothionate - see (^{35}S)TBPS
(^{35}S)TBPS - binding to benzodiazepine complex, 377
(±)Tetrahydroanisocycline - binding to D1 and D2 receptors, 321
(±)Tetrahydropalmatine - binding to D1 and D2 receptors, 321
Thiamine deficiency - effect on specific enzymes, 439
Thiamine dependent enzymes, 439
Thyroid deficiency - and maturation of glial cells, 239
Thyroid deficiency - related to markers for astrocytes, 239
Thyrotropin release hormone degrading enzyme - pyroglutamyl peptidase II, 81
Torpedo neuromuscular synapses - proteolipid antigen, 169
Trembler mice - uptake and metabolism of palmitate, 61
Trimethyl tin intoxication - effect on muscarinic receptors, 475
^{3}H-tryptophan - binding, 25
Tubulin mRNAs, 215
Tyrosine hydroxylase - inhibited by N-methylisoquinolinium ion, 315

Uptake - of palmitate, 61
Uridine - effect on dopamine release and behaviour, 107
Uridine effects - following haloperidol treatment, 107
Uridine treatment - haloperidol effects on behaviour, 107

Valproic acid - effect on glycerolipid, 397
Vesicles - containing noradrenaline, 445
Vesicles - dopamine-β-hydroxylase, 445
Vesicles - from cat ovary, 445

X-irradiation - effect on dopamine and noradrenaline, 97

PRINTED IN GREAT BRITAIN BY BPCC WHEATONS LTD, EXETER
